Feb 28, 2017 . Smaller, lighter, more powerful—the Autodesk® portfolio. The free Autodesk® 3ds Max®. A fundamental objective of Autodesk® is to help. AutoCAD; 2017 .Q: How to set initial value of component property from class? I have a @NgComponent that looks like this export class FooComponent { @Input() readonly fooProp:string; } I have a component that needs to do some processing on fooProp's initial value. export class DoComponent { @Input() readonly barProp:string; readonly doSomethingWithBarProp: string = 'barProp's initial value'; constructor(private foo: FooComponent) { //this.foo.fooProp = 'fooProp's initial value' this.foo.fooProp = 'fooProp's initial value'; } The problem is that this.foo.fooProp is just a string, and so you can't call.setter() on it. So, how do you set fooProp's initial value if you can't access the fooProp property directly? A: I am not familiar with Angular itself, but you should be able to set that property in the constructor and 2d92ce491b
