Raman Raghav 2.0 movie download hd 1080p kickass torrentQ: Encode/Decode object in base64 to Base64 encoded Json object How to convert a json object with images to base64 string and vice versa (encode/decode the json object to base64 string and vice versa)? I am trying to convert this json object (with images) in base64 string, so that it can be uploaded to server without needing to send a file. { "addresses": { "address": "some address", "city": "some city", "country": "some country", "email": "some e-mail", "image": "" }, "city": "some city", "country": "some country", "customerId": "some id", "firstName": "John", "lastName": "Doe", "mobile": "12345678901", "shippingAddress": "some address", "state": "some state", "user": { "firstName": "John", "lastName": "Doe", "mobile": "12345678901" } } How to achieve this? I am trying to achieve this in Node.js, and converting this json object to base64 string. A: Use node-base64 module var string = new Buffer(json.toString(), 'utf8').toString('base64'); Source: | A shocking new poll has revealed that only 2 percent of Americans actually believe that homosexuality is not a sin. The shocking finding was released today by the Institute for American Values (IAV), and consists of an analysis of a survey by the Pew Research Center. The poll found that a shocking 22 percent of Americans believe that "homosexuality is always a sin," and that nearly 4 in 10 believe that "homosexuality should be illegal." A little over 7 percent believe that "homosexuality can never be a sin," while some 11 percent believe that "homosexuality can be a sin but 2d92ce491b
