Workers are facing a new kind of workplace, and their employers are asking for new ways of doing business. The National Research Council (NRC) and the American Society for Engineering Education (ASEE) are developing a collaborative Hello there I am looking for a software to extract text from a website and then from that text want to create a new document from it. I would like to do this for the same website for numerous sites. Can anyone recommend some software to help with this? We are looking for a simple tool to help our customers to create Word Documents. Features: File Upload Drag & Drop Convert to XHTML Extract content from existing Word Documents This is a very simple task but we do not want to waste our resources to develop ...helper me to create a SCCM plugin that can take the software inventory of a workstation and add a certificate to it. We have a folder structure on our workstation software so I think I would have to have the plugin print out how many instances of each software we have. It's something very easy. Maybe the only hurdle will be attaching a certificate. We will need to add I need someone to write and program a small DLL library to take an average of the values of 20 hardware modules and save them to a new text file. I already have the program that produces the module data. I just need the code to take the data and format it as a text file. I would like the code to be... ...with the software and 09e8f5149f
