Organize your schedule into work and rest intervals based on your current state of health Prevent on-screen notifications and customize the sound alerts Add important tasks to a list and mark them off as they are completed Create a to-do list Requires DirectX9 to run Requires Windows 7 or later Scheduling is not as easy as it sounds. There are so many things to consider: time, habits, other commitments, personal preferences, weather, etc. but the most important factor is one's internal clock, or circadian rhythm. Anomodont is an app that works with that, based on several research studies on the topic. It works on the principle that people experience the world in a cyclic pattern, and most people have a certain time that is most productive, most active and more restful. This makes Anomodont a useful app that can improve both work and life. Anomodont's algorithm is very easy to use, it's designed to be intuitive and to help the user find a good schedule, which is not always the case with other software. After that, it's up to you to configure it and use it for a while. - Automatically adjust the morning, noon, evening and night periods - Choose the number of hours you wish to spend during the rest period - Set the number of breaks during a work period - The rest period can take place when the screen is switched off - The daily schedule can be configured according to your needs - The daily schedule can be configured on a weekly, daily or hourly basis - Weather condition can be included in the daily schedule - Temperature and light can be configurable at any time - The day/night cycle can be configured - The number of breaks can be configured - The number of hours of sleep can be configurable - Two different views can be set: analog and digital - Customizable notification when the scheduled break has arrived - Ability to save the daily schedule - Support for dynamic schedules - Dynamic schedules can be configured: weekly, daily, hourly, daily on weekdays - Dynamic schedules can be configured according to your needs - Intervals for weeks, months, years and even holidays can be configured - Days of the week can be configured in a daily, weekly or monthly basis - Days of the week can be customizable - Different days of the week can be disabled - You can choose the starting day - You can choose the starting

What's New In?

Woret is a simple and effective application designed to help you organize your time into work and rest intervals. Once you start the timer, the program will show a notification in your system tray area, which you can disable, and it will prevent you from sending any unnecessary notifications. You can add important tasks to a list and mark them off as you complete them. However, it doesn't have a task manager. No installation or advanced configurations required The application comes in the form of a single executable file, which can be launched from any location without installing anything beforehand. The application provides a health assessment that will determine how long you should work or rest based on your current state of health. You can set this to a custom time, and it will adjust the work and rest times accordingly. Work and rest times can be configured on a per-application basis. You can also skip a break if you can't afford to rest at a certain time. Some basic features are available, including the creation of to-do lists and the display of a notification when a break is due.
